THE PROBLEM

A 100-Year-Old Technology Costing Lives & Billions Annually

The vehicle license plate has not changed in over a century — a static stamped piece of metal providing only visual identification. In an era where every system on the road is connected, this outdated tool is a dangerous blind spot. Law enforcement, drivers, insurers, and agencies operate without real-time information precisely when safety demands it most. The limitations are measurable: lives lost, assets stolen, and inefficiencies costing billions per year.

THE SOLUTION

Digi-Tronic™ • World's Most Advanced Digital License Plate

- E-ink + HD 4K camera + color LED display — IP68 NEMA 6P rated
- Built with Foxconn / CircuTech International (HKEX: 8051.HK)
- One-click DMV registration — no DMV visits ever required
- Panasonic Connect XCelerate Partner — 2,000+ nationwide resellers
- T-Mobile, Microsoft Azure, MADD — technology & advocacy partnerships
- Already deployed: First digital plates on law enforcement — Maryland PD

TECHNOLOGY PLATFORM

A Connected Safety Ecosystem — Not Just a Plate

Collision Detection System 7 emergency touchpoints. Real-time crash data to insurers & first responders.	Color-Coded Safety Signals Vehicle status visible to all drivers & law enforcement at a distance.
GPS + Stolen Vehicle RTR Real-time recovery tracking connected to national databases.	Gunshot Detection System Embedded acoustic sensors reporting directly to law enforcement.
Contactless Traffic Stops 30-second police report via Airplate app. Safer for officers & drivers.	National Amber Alert API Instant integration with national alert infrastructure.
School Bus Safety Suite Parent app, passenger manifests, pickup/drop-off push notifications.	Fleet Management + AirKey Rental checkout, modular configs, seamless fleet integrations.

LEGISLATIVE MOAT

Active enabling legislation in 8 states creates a mandated, government-compelled market:

California AB 984	Colorado HB 22-1162	Florida HB 91	Florida SB 1178
Georgia SB 210	Illinois SB 0102	Texas HB 718	Washington HB 1991

REVENUE MODEL

Hardware + SaaS + Data: Three Compounding Revenue Streams

Hardware Sales • Fleet & Consumer

Primary Deployment Revenue

Unit sales to state DMVs, law enforcement fleets, school districts, rental agencies, and consumers. Panasonic's 2,000-reseller network accelerates distribution nationally.

SaaS Subscriptions • Recurring

Software Platform + Data Services

Monthly subscription fees for law enforcement dashboards, fleet management portals, school district safety platforms, and insurance integration services.

Anonymized Traffic Data

Government + Insurance Data APIs

Aggregate, anonymized vehicle behavior data sold to transportation agencies and insurance networks — a high-margin, zero-COGS revenue layer at scale.

WHY NOW • IMMEDIATE ACTION REQUIRED

Eight states have active legislation mandating digital plate compatibility. Maryland law enforcement is already deployed. The window to enter as a category-defining infrastructure partner — before legislative mandates trigger mass procurement — is open right now. This \$25M Series A funds manufacturing scale, national deployment, and regulatory expansion into 42 remaining states.

STRATEGIC PARTNERSHIPS

Panasonic • Foxconn • T-Mobile • Azure

Panasonic XCelerate: joint marketing, 2,000+ resellers, nationwide service & warranty via PSG. Foxconn hardware manufacturing at global scale.

PROOF OF DEPLOYMENT

Maryland PD • First Ever on Law Enforcement

Historic milestone: first digital license plates ever installed on active law enforcement vehicles. Market validation at the highest institutional level.

MARKET SIZE

285M+ Vehicles • 50-State Opportunity

Every registered vehicle in the U.S. is an addressable unit. Legislative mandates in 8 states provide immediate procurement pipeline.
